

What We Import

We practice LOCAL FIRST.

Local First

For items we do not grow or are experiencing a shortage of, we source from other local certified organic growers first.

We turn to import for things that are out of season, or do not grow here at all.

Import Partners

We have a network of organic growers in the sunny south who grow products for us under the Pfenning brand.

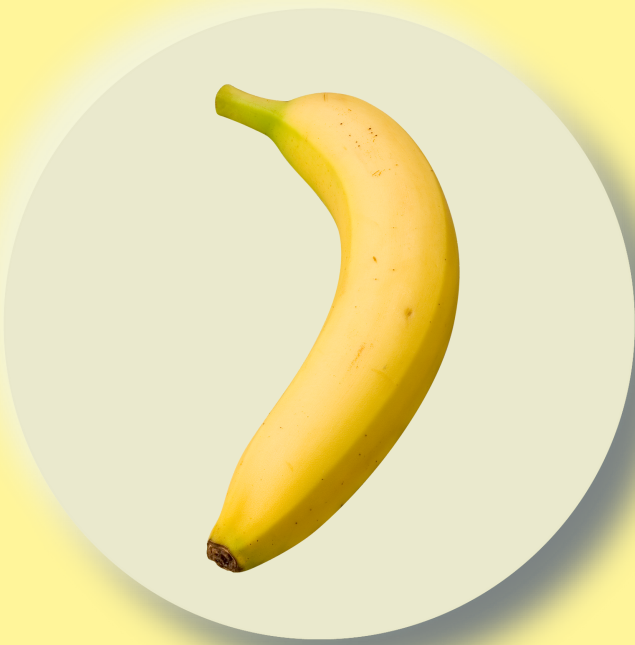

This includes items such as carrots, kale, spinach, broccoli & more.

FairTrade

Equifruit Bananas

Anything we can source that is FairTrade and certified organic

100% Import

Some items do not grow in Canada at all! Through our import program we can offer these along with our local goods to ensure a complete selection.

This includes citrus fruit, avocado, ginger, tropical fruits and more.
